**THE ADDED (FLEXIBLE) EDGE TO SURFING**

Pro Teck Fins are surfboard fins with soft leading and trailing edges designed to enhance board performance and reduce fin cuts. The flexible trailing edge allows the water to flow smoother with less turbulence off the fin. The flexible edge also creates a "rudder action" as the water pressure bends the edge, creating tighter and more fluid turns, similar to the fins of dolphins and sharks. The flexible urethane edge also, greatly reduces fin cuts compared to conventional hard edge fins.

Pro Teck fins are available in a variety of models for all levels of surfing, from the extra rigid Carbon core, rigid core Performance, medium core Powerflex, and flexible Superflex.

### STATE OF THE ART FIN DESIGNS AND MATERIAL

Pro Teck Fins are designed with state of the art computer aided (CAD) software and produced with the finest materials that do not shrink or warp. This creates fins with perfect foils that flow through the water smoothly and naturally.

#### CENTER FIN DESIGN

The center fins have a streamlined leading and trailing edge that is soft and flexible, making the fin flow smoothly through the water.

#### SIDE FIN DESIGN

The side fins are designed with a "rounded" or "radiused" leading edge that makes turns smoother and forgiving. The trailing edge is designed with an exclusive "beveled" inside edge that allows the water to release off the fin faster and smoother than conventional fins that have a flat or dull trailing edge. Pro Teck Fins are the only fins that have streamlined or "sharp" trailing edges that are soft and flexible, that will greatly reduce fin cuts!

"Beveled" inside edge

"Rounded" leading edge

#### Flexible Edges – Regular & Stiff

Pro Teck Fins are available in two different flexible edges: Regular 75A and Stiff 85A. The fins rigid cores are the same, while providing two edge flexes for different surfing styles, wave conditions and board shapes.

#### Regular 75A Edge –

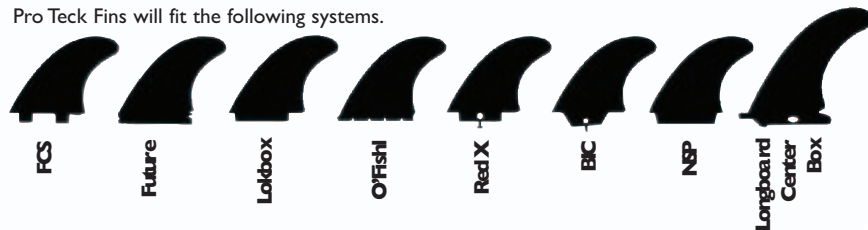

yellow or tint colors. For a loose, tight turning, and forgiving ride.

#### Stiff 85A Edge –

white or solid colors. For more drive, projection, and drawn out turns.

### FIN SYSTEMS

Pro Teck Fins will fit the following systems.

## FIN SIZES AND SHAPES

Pro Teck Fins are available in a range of models for every level of surfing.

### PRO TECK - CARBON-X FINs

Carbon-X Pro Teck Fins have extra rigid cores that create maximum drive, projection, and speed. The cores are also extra light for maximum weight savings. Their 85A trailing edge make the board ride fluid and fast.

Carbon-X Pro Teck Fins are recommended for experienced to professional surfers only.

#### SHORTBOARDS

- 4.25" Thruster set for surfers under 150 lbs.
- 4.50" Thruster set for surfers over 150 lbs.
- Will fit FCS, Future and Lokbox fin systems.

### PRO TECK - PERFORMANCE FINs

Performance Fins have a rigid core that creates good drive and projection off bottom turns and cutbacks. The combination of the flexible edges and rigid core will help to make your board ride smoother, faster, and easier to turn. This will allow you to surf better, reduce fin injuries, and add more fun to the sport of surfing! Available in Regular 75A and Stiff 85A edges.

Pro Teck Performance Fins with the rigid core are recommended for intermediate to professional surfers.

#### SHORTBOARDS

- 4.0" Thruster set for surfers under 100 lbs.
- 4.25" Thruster set for surfers under 150 lbs.
- 4.50" Thruster set for surfers over 150 lbs.
- Will fit FCS, Future, Lokbox, O'Fishl, Red X, and NSP fin systems.

#### LONGBOARDS

- 7.0" Center Fin
- 9.0" Center Fin
- 4.0" Side Fins

### POWER FLEX - PERFORMANCE FINs

Power Flex is a Pro Teck Fin with a medium core flex. The fin bends on turns, and then springs back, creating forward thrust, similar to a swim fin. The medium flex core and flexible trailing edge, makes the board turn smooth and fluid, with continuous speed.

Power Flex Fins are recommended for intermediate to professional surfers.

#### SHORTBOARDS

- 4.25" Thruster set for surfers under 150 lbs.
- 4.50" Thruster set for surfers over 150 lbs.
- Will fit FCS, Future and Lokbox fin systems.

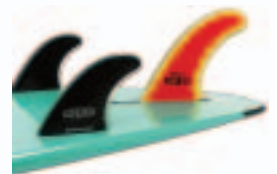

#### LONGBOARDS

- 7.0" Center Fin
- 9.0" Center Fin
- 4.0" Side Fins

### SUPER FLEX - SAFETY FINs

Super Flex Fins are Pro Teck Fins with a soft flexible core and soft edges, making it the ultimate safety fin for beginners, surf schools, and board rentals. Super Flex Fins are also for the surfer who wants a fun, very easy to turn, and forgiving fin.

Note: Super Flex Fins are recommended for beginners to professional surfers.

#### SHORTBOARDS

- 4.5" Center Fin as a center, sides, and three fins set up.
- Will fit FCS, Future, Lokbox and O'Fishl fin systems.

#### LONGBOARDS

- 7.0" Center Fin
- 9.0" Center Fin
- 4.50" can be used as side fins.
